# OUR STORY

This is a family-run pistachio company named Vira Sanat Amir Samangan with the brand name Mani Renjal, located in Borje Shile, Sirjan city, Kerman province, Iran.

Inspired by the successful agricultural and trading careers of his grandfathers, Gholam Abbass Asadi (a renowned farmer) and Asadollah Mosavi (a skilled trader), I (Amir Mahdi Asadi) established the company to produce high-quality organic pistachios.

**Asadollah  
Mosavi**

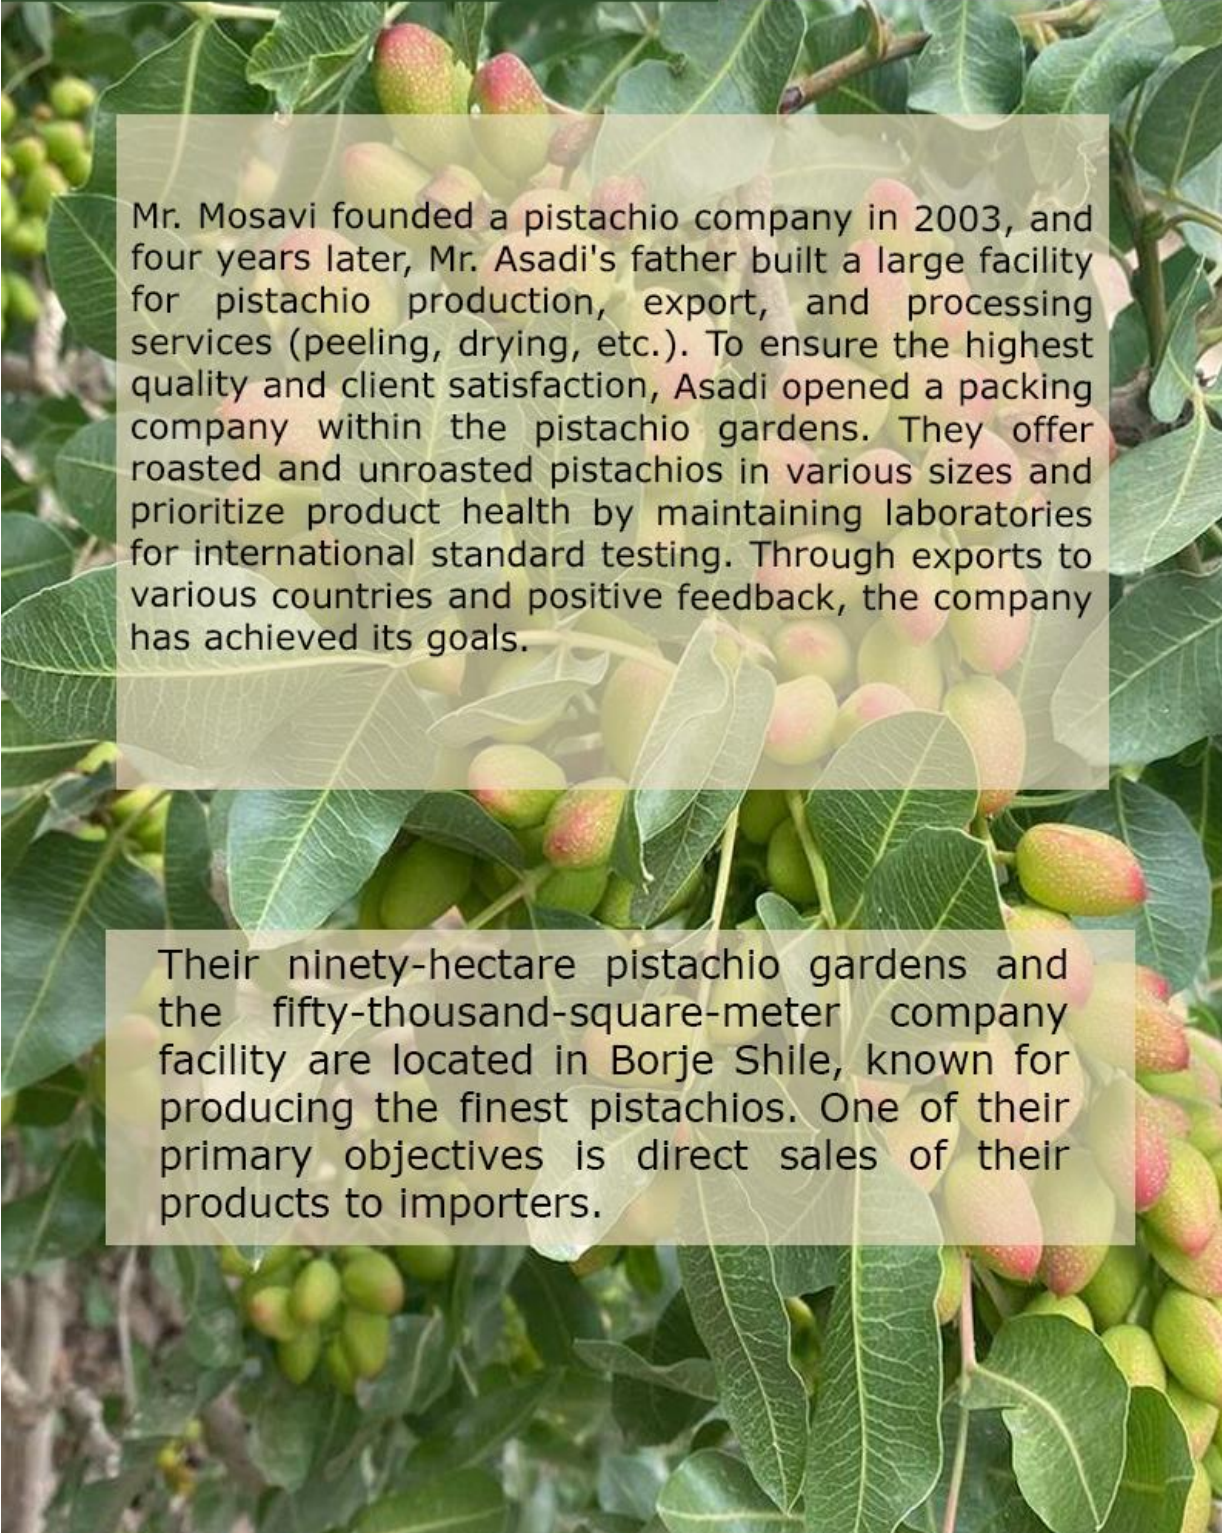

**Rahmat Allah  
Asadi**

**Amir Mahdi  
Asadi**

# Company History & Establishment

Mr. Mosavi founded a pistachio company in 2003, and four years later, Mr. Asadi's father built a large facility for pistachio production, export, and processing services (peeling, drying, etc.). To ensure the highest quality and client satisfaction, Asadi opened a packing company within the pistachio gardens. They offer roasted and unroasted pistachios in various sizes and prioritize product health by maintaining laboratories for international standard testing. Through exports to various countries and positive feedback, the company has achieved its goals.

Their ninety-hectare pistachio gardens and the fifty-thousand-square-meter company facility are located in Borje Shile, known for producing the finest pistachios. One of their primary objectives is direct sales of their products to importers.

## **Pistachio cultivation and harvesting using advanced technologies**

Our company is engaged in the production, packaging, and distribution of pistachio products. Our capabilities include:

The pistachio terminal line technology enables precise and automatic control over pistachio cultivation and harvesting. This technology utilizes sensors and smart devices to detect optimal harvest times, control moisture and temperature, and enhance product quality. These tools improve efficiency and reduce waste in pistachio cultivation and harvesting.

## Quality packaging and international standards

Quality packaging and international standards enable the provision of high-quality products and food safety. These standards include hygienic packaging, the use of high-quality raw materials, and attention to product aesthetics. Customization of taste and packaging can meet the needs of various companies and markets, enhancing the customer experience worldwide.

## **Distribution to domestic and international markets**

Distribution to domestic and international markets, utilizing suitable transportation including maritime and land transport to countries such as Russia, India, European countries, and countries around the Persian Gulf, facilitates access to large and lucrative markets. These transportation methods, coupled with appropriate infrastructure and effective logistics strategies, enable delivery to distant destinations while reducing costs and transit times.

# Global //

Mani Renjal

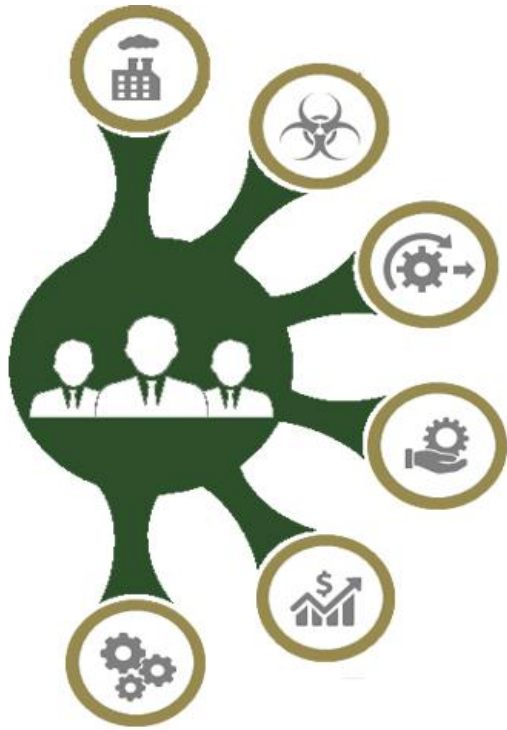

# Mision //

Our company, focusing on quality, competitive pricing, and customer service, aims to enhance customer satisfaction and expand market reach. Our strategies include:

## **Establishing direct**

Establishing direct communication with customers through the possibility of witnessing the pistachio collection to packaging process in Sirjan, Iran, provides an opportunity for deeper connection and greater trust with customers. This opportunity allows customers to directly observe the production and packaging processes, ensuring the expected quality and standards. This direct communication can add value and enhance trust in the company for customers, strengthening long-term and sustainable relationships with them.

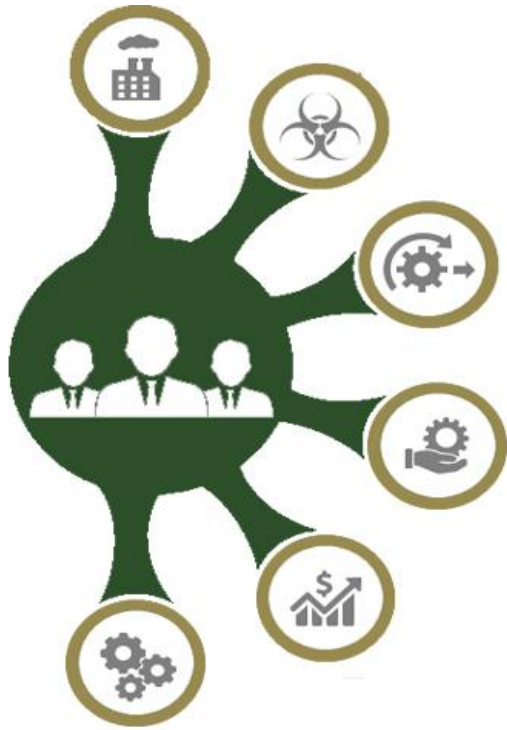

## Mision //

We have always strived to prevent pistachios from being contaminated with *Aspergillus* fungus and the production of Aflatoxin poison through sufficient research in modern science.

## Employee training

Ongoing and targeted training for employees in areas of cultivation, harvesting, adherence to global hygiene, and quality control has created a culture of safety and hygiene in the workplace and encouraged active employee participation. Continuous monitoring ensures the effectiveness of programs and identifies and addresses non-conformities effectively.

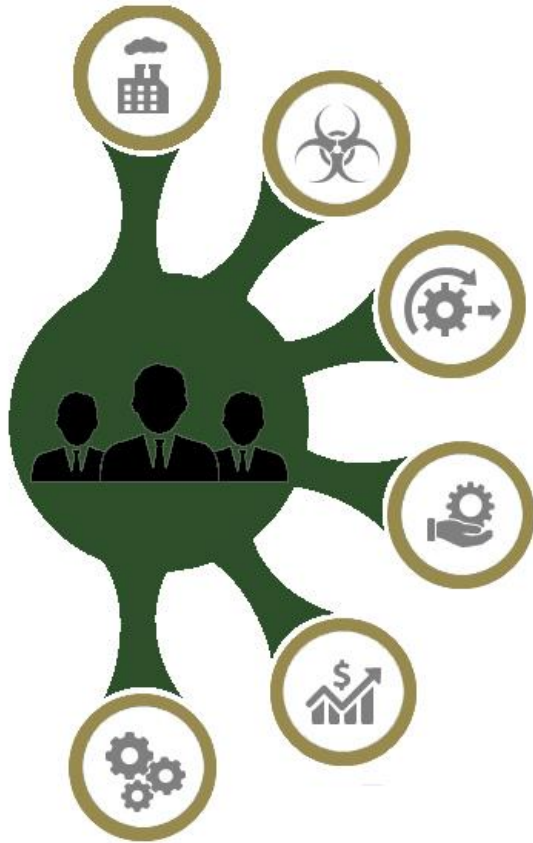

# Mision //

**Maintaining  
superior quality at  
a competitive price**

Our commitment to quality, coupled with producing pistachios of the highest quality alongside competitive pricing, is justified by optimizing processes and closely controlling costs. Additionally, direct supply to customers by eliminating intermediaries can be considered to reduce costs and offer products at competitive prices.

Our company aims for sustainable development and increased presence in global markets. Our goal is to enhance product quality and export to at least 50 countries worldwide.

## Vision //

Our future plan includes enhancing product quality through packaging using recycled plastic, which can be a significant step towards environmental protection and reduction of environmental pollutants. This plan not only helps improve product protection during transportation but also adds more value to the products and sends a positive message to customers about the company's sustainability and social responsibility.

# Certi //

Our company, as one of the leading pistachio producers, has obtained national and international licenses in the field of product quality and health, including:

License for operation from the Ministry of Industry, Mine, and Trade of Iran  
Certifications such as IFS, FSSC, KOSHER, HALAL

# Certi //

License for operation from the Ministry of Industry, Mine, and Trade of Iran : 269630863127 and also has the Healthy apple license

These licenses demonstrate our efforts to improve product quality and services to customers.

# Best // OUR PROUDUCT

Iranian pistachios are generally categorized into two types: Akbari and Kalleh Ghouchi, which respectively include Ahmad Aghaei and Fandoghi varieties. Pistachios of each breed are divided into several groups based on size, which forms the basis for pricing pistachios.

Our products include various types of dried, fresh pistachios, and their derivatives, such as:

# Long Pistachio

Mani Renjal

FAQ

## Why should we choose Mani Renjal Company?

- 1** Mani Renjal provides facilities for processing pistachios with various flavors. This allows you to accurately meet the taste preferences of your customers, which can enhance their purchasing experience. We process pistachios for farmers who lack processing facilities using advanced machinery while adhering to health and safety standards. Not all farmers and locals in various areas have access to processing equipment, so we undertake this task for them. Mani Ranjall provides this service for all farmers with reasonable prices and excellent quality.

- 2** Mani Renjal packages pistachios according to your personal preference or suitable for gifting, eliminating labor and packaging costs from your process. Packages vary from 30 grams to 50 kilograms which can be sent in unlimited quantities. This can be a significant advantage for individuals looking for unique and quality gifts.

Mani Renjal

FAQ

### Why should we choose Mani Renjal Company?

- 3 Our company's employees receive training according to the quality control standards of the Food and Drug Administration and the Quality Control standards of the United States. They also use natural fertilizers such as chicken manure instead of chemical fertilizers. Additionally, hygiene is strictly observed during the harvesting process to ensure no Aflatoxin contamination.

- 4 Compared to competitors, Mani Renjal's prices are usually more competitive while maintaining quality. This can be a significant advantage for you as a customer, as you can seek a greater return on your investment.

Mami Ranshal

FAQ

## Why choose Iranian pistachios?

- 1 Iranian pistachios are known as pioneers in pistachio production and export worldwide. This authenticity and distinct breed set Iranian pistachios apart from other regions and add value to them. Iranian pistachios have a long and ancient history in agriculture and production, which adds to the credibility and trust in this product.

- 2 One prominent feature of Iranian pistachios is that they are usually exempt from hormones and chemical additives used in industrial cultivation, assuring customers that they are receiving a natural and healthy product.

Mami Ranshal

FAQ

## Why choose Iranian pistachios?

**3** Iranian pistachios are rich in nutrients such as calcium and healthy fats, which are very beneficial for overall health. This can be appealing to individuals seeking a healthy diet and proper nutrition

**4** Compared to other pistachios such as American or Turkish varieties, Iranian pistachios excel in terms of quality, taste, and nutritional value. This gives buyers more confidence in this product.

# Processing and Packaging Pistachio Factory

The ManiRenjal brand, under the company name ViraSanatSamangan, is located at the AmirMahdi pistachio terminal, also known as the pistachio sorting and processing terminal, is located in Sirjan, Kerman Province, Iran. This terminal handles everything from collecting to packaging pistachio products.

# Pistachio Collection

During this stage, freshly harvested pistachios from local orchards and farms are carefully selected and sorted by skilled workers.

# Cleaning and Drying

The collected pistachios are transferred to a location where they undergo cleaning and drying. This stage involves removing impurities, preparing dried pistachios, and minimizing moisture content.

# Dehulling

After cleaning, the pistachios are sent to specialized machinery for dehulling. This stage prepares the pistachios for the next process.

## Processing and Quality Evaluation

Dehulled pistachios are transported to a location where further processing, such as sorting and categorizing based on size and quality, takes place. This stage also involves quality assessment by experts.

# Packaging

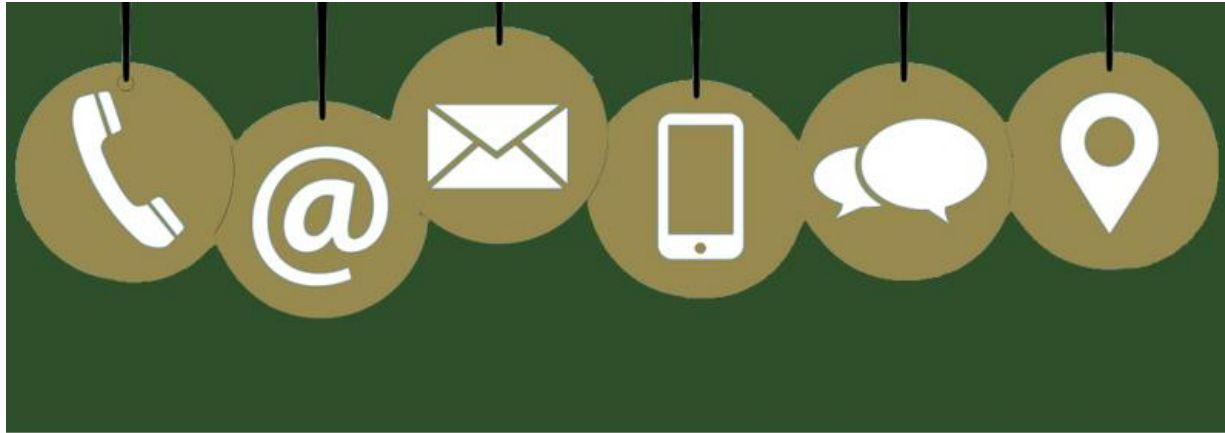

Processed pistachios are transferred to the packaging area where they are packaged in various forms and sizes, ready for transportation to different markets.

## Market Distribution

After packaging, pistachio products are ready for transportation to domestic and international markets. These products are carefully packaged and transported to their desired destinations using suitable transportation methods.
