RETURN

It can be used in air purification and food and chemical industries. Activated carbon is obtained from pyrolysis of materials such as coal, wood, pistachio shell, and the shell of other fruits.

Activated charcoal has small pores through which water passes. To produce this material, organic elements are subjected to intense heat and in an oxygen-free environment. As a result of this, activated carbon, amounts of gas and other substances are created.

From every 12 kg of pistachio shell, 1 kg of active carbon is extracted.

Medicinal uses of activated carbon

Among the properties of pistachio white shell and the production of activated carbon, it is the treatment of poisoning caused by spoiled food and overuse of medicine. It may have happened to you that you had heartache and nausea from taking too much medicine and eating poisoned food. Activated charcoal tablets are one of the most popular substances used in these situations.

Activated charcoal tablets are also used in emergency rooms and other medical centers. It is also used to eliminate flatulence, bile problems, and relieve abdominal pain.

ABOUT US

We are a pioneer in
producing and
exporting pistachios

OUR HISTORY

COMPANY HISTORY

COMPANY CAPABILITIES

MISSION

VISION

PRODUCING PROCESS

OUR STORY

This is a family-run pistachio company named Vira Sanat Amir Samangan with the brand name Mani Renjal, located in Borje Shile, Sirjan city, Kerman province, Iran. Inspired by the successful agricultural and trading careers of his grandfathers, Gholam Abbass Asadi (a renowned farmer) and Asadollah Mosavi (a skilled trader), I (Amir Mahdi Asadi) established the company to produce high-quality organic pistachios.

RETURN TO
ABOUT US MENU

COMPANY HISTORY

Mr. Mosavi founded a pistachio company in 2003, and four years later, Mr. Asadi's father built a large facility for pistachio production, export, and processing services (peeling, drying, etc.). To ensure the highest quality and client satisfaction, Asadi opened a packing company within the pistachio gardens. They offer roasted and unroasted pistachios in various sizes and prioritize product health by maintaining laboratories for international standard testing. Through exports to various countries and positive feedback, the company has achieved its goals.

Their ninety-hectare pistachio gardens and the fifty-thousand-square-meter company facility are located in Borje Shile, known for producing the finest pistachios. One of their primary objectives is direct sales of their products to importers.

RETURN TO
ABOUT US MENU

SCOPE OF ACTIVITIES AND CAPABILITIES

Our company is engaged in the production, packaging, and distribution of pistachio products. Our capabilities include:

-Pistachio cultivation and harvesting using advanced technologies

The pistachio terminal line technology enables precise and automatic control over pistachio cultivation and harvesting. This technology utilizes sensors and smart devices to detect optimal harvest times, control moisture and temperature, and enhance product quality. These tools improve efficiency and reduce waste in pistachio cultivation and harvesting.

SCOPE OF ACTIVITIES AND CAPABILITIES

-Quality packaging and international standards

Quality packaging and international standards enable the provision of high-quality products and food safety. These standards include hygienic packaging, the use of high-quality raw materials, and attention to product aesthetics. Customization of taste and packaging can meet the needs of various companies and markets, enhancing the customer experience worldwide.

PREVIEW

ABOUT US MENU

NEXT

SCOPE OF ACTIVITIES AND CAPABILITIES

-Distribution to domestic and international markets

Distribution to domestic and international markets, utilizing suitable transportation including maritime and land transport to countries such as Russia, India, European countries, and countries around the Persian Gulf, facilitates access to large and lucrative markets. These transportation methods, coupled with appropriate infrastructure and effective logistics strategies, enable delivery to distant destinations while reducing costs and transit times.

PREVIEW

RETURN TO
ABOUT US MENU

MISSION

Our company, focusing on quality, competitive pricing, and customer service, aims to enhance customer satisfaction and expand market reach. Our strategies include:

-Establishing direct communication with customers

Establishing direct communication with customers through the possibility of witnessing the pistachio collection to packaging process in Sirjan, Iran, provides an opportunity for deeper connection and greater trust with customers. This opportunity allows customers to directly observe the production and packaging processes, ensuring the expected quality and standards. This direct communication can add value and enhance trust in the company for customers, strengthening long-term and sustainable relationships with them.

[RETURN TO ABOUT US MENU](#)

[→ NEXT](#)

MISSION

-Employee training strategy

Ongoing and targeted training for employees in areas of cultivation, harvesting, adherence to global hygiene, and quality control has created a culture of safety and hygiene in the workplace and encouraged active employee participation. Continuous monitoring ensures the effectiveness of programs and identifies and addresses non-conformities effectively.

We have always strived to prevent pistachios from being contaminated with Aspergillus fungus and the production of Aflatoxin poison through sufficient research in modern science.

ABOUT US MENU

→
NEXT

MISSION

-Maintaining superior quality at a competitive price

Our commitment to quality, coupled with producing pistachios of the highest quality alongside competitive pricing, is justified by optimizing processes and closely controlling costs. Additionally, direct supply to customers by eliminating intermediaries can be considered to reduce costs and offer products at competitive prices.

PREVIEW

RETURN TO
ABOUT US MENU

VISION

Our company aims for sustainable development and increased presence in global markets. Our goal is to enhance product quality and export to at least 50 countries worldwide.

Our future plan includes enhancing product quality through packaging using recycled plastic, which can be a significant step towards environmental protection and reduction of environmental pollutants. This plan not only helps improve product protection during transportation but also adds more value to the products and sends a positive message to customers about the company's sustainability and social responsibility.

FAQ

Frequently Asked Questions

Q: Why should we choose Mani Renjal Company?

1- Suitable Packaging Options:

Mani Renjal packages pistachios according to your personal preference or suitable for gifting, eliminating labor and packaging costs from your process. Packages vary from 30 grams to 50 kilograms which can be sent in unlimited quantities. This can be a significant advantage for individuals looking for unique and quality gifts.

2- Custom Flavor Processing:

Mani Renjal provides facilities for processing pistachios with various flavors. This allows you to accurately meet the taste preferences of your customers, which can enhance their purchasing experience.

3- Trained Staff:

Our company's employees receive training according to the quality control standards of the Food and Drug Administration and the Quality Control standards of the United States. They also use natural fertilizers such as chicken manure instead of chemical fertilizers. Additionally, hygiene is strictly observed during the harvesting process to ensure no Aflatoxin contamination.

4- More Affordable Pricing:

Compared to competitors, Mani Renjal's prices are usually more competitive while maintaining quality. This can be a significant advantage for you as a customer, as you can seek a greater return on your investment.

FAQ

Frequently Asked Questions

Q: Why choose Iranian pistachios?

1- Authenticity and Breed , Long History:

Iranian pistachios are known as pioneers in pistachio production and export worldwide. This authenticity and distinct breed set Iranian pistachios apart from other regions and add value to them.

Iranian pistachios have a long and ancient history in agriculture and production, which adds to the credibility and trust in this product.

2- Hormone-Free:

One prominent feature of Iranian pistachios is that they are usually exempt from hormones and chemical additives used in industrial cultivation, assuring customers that they are receiving a natural and healthy product.

3- High Nutritional Value:

Iranian pistachios are rich in nutrients such as calcium and healthy fats, which are very beneficial for overall health. This can be appealing to individuals seeking a healthy diet and proper nutrition.

4- Superior to Competitors:

Compared to other pistachios such as American or Turkish varieties, Iranian pistachios excel in terms of quality, taste, and nutritional value. This gives buyers more confidence in this product.
